

VIDEO ASPECT RATIO MANIPULATION

ABSTRACT OF THE DISCLOSURE

According to the invention, a video distribution system is disclosed. The video distribution system distributes a video program in a first aspect ratio and includes information to convert the first aspect ratio to a second aspect ratio. Included in the video distribution system are a distribution point and a video converter that is located remotely from the distribution point. The video converter receives the information and the video program from the distribution point. The video converter uses the information to guide conversion between the first aspect ratio and the second aspect ratio.
